SentryOne

[SentryOne](#) enables Microsoft data professionals to monitor, diagnose, and optimize performance across physical, virtual, and cloud environments. Our software provides unparalleled awareness, insight and control over the true source of performance issues. Whether you are using Azure SQL Database for your SaaS based business, for enterprise production or for development and testing, it is important to keep it running at peak efficiency. Monitor important performance metrics, including DTU usage, so you know when it is time to provision more resources. DB Sentry provides the ability to monitor performance and manage events occurring on your system. Top SQL allows you to see the queries that have the most impact on your overall performance.

SentryOne is offering a 1 year license per location of DBSentry(formerly Performance Advisor for Azure SQL Database) + an extended eval edition of their tools for all attendees.

JetBrains

[JetBrains](#) makes intelligent development tools to simplify challenging tasks, automate the easy ones, and helps you develop with pleasure. Widely known for innovative .NET developer tools such as ReSharper for code analysis and refactoring in Visual Studio, dotCover for code coverage analysis, and dotTrace for performance profiling, all of which are tightly integrated with Microsoft Visual Studio.

Also the developers of Rider, a new standalone cross-platform .NET IDE that is based on our IntelliJ platform and includes all ReSharper's code intelligence.

Jetbrains is offering a full license of choice per location.

ServiceBus360

[ServiceBus360](#) is a simple cloud based platform to manage your Azure Service Bus namespaces. It provides efficient operations and monitoring capabilities on any Service Bus resource. Most often, companies focus on platform enhancements and miss out on having better management and operational tools. We observed this with BizTalk server and created BizTalk360 to address that gap. Similarly, the standard Azure portal is limited in terms of exposing the full capabilities of Service Bus. To overcome this, we developed ServiceBus360 – an advanced operations, monitoring and analytics tool focused solely to enhance the day to day working experience with Microsoft Azure Service Bus. Our goal is to make life easy for anyone who is using Azure Service Bus resources (Queues, Topics, Relays and Event Hubs).

Servicebus360 offers an extended license until September 30 for all attendees, and this for 3 namespaces, 3 alarms per namespace, 3 resources per namespace to monitor and 2 users.

MyGet

[MyGet](#) No-hassle private package feeds. Focus on building and shipping great software.

Create NuGet feeds, npm, Bower, Maven and Vsix repositories with your own packages and those from other package sources such as NuGet.org, Npmjs.com or Maven Central.

MyGet is offering a 1 year Starter license per location.

CloudMonix

[CloudMonix](#) is an Azure monitoring and automation platform. It provides in-depth monitoring of 30+ Azure services, automated recovery of production issues, sophisticated auto-scaling, integration to many 3rd party products and much more.

Cloudmonix is offering every attendee a promotion code good for 1 full month of unlimited monitoring under the Ultimate plan.

Opsgility

[Opsgility](#) provides comprehensive online training for Microsoft Azure, Office 365, Dynamics CRM as well as a full library of on-demand Microsoft Official Curriculum for enterprise products like Windows Server, SQL Server, SharePoint and More.

Our online training is designed to not only assist with passing certifications but to also build core technical and business skills for adapting the cloud to meet your needs. We provide courseware for Architecture, Operations, Developers, Data Specialists, Technical and Business Decision Makers and even sales professionals.

Opsgility is offering 3 – 12 month subscriptions (per event) (after registration subscription, no cc needed) and a 30 day subscription free trial for all attendees.

Microsoft DX

Microsofts Global Developer Experience (DX) Community Team is pleased to be a sponsor of Global Azure Bootcamp 2017 with Azure-related community content and event catering. Event catering is limited and subject to availability; community-led Global Azure Bootcamp events may qualify for catering for up to 100 attendees. Microsoft DX Azure [curriculums and content](#) are available for use by event organizers and attendees.
